Course #202: Health and Safety

Field inspections involve a certain degree of risk. Inspections of wastewater treatment plants, manufacturing plants, laboratories and mines are each associated with various hazards. A safe field inspection depends on the recognition, evaluation and control of hazards. Cal/OSHA regulations and established safety policies are continually being updated. This course/manual has been assembled as a "hands-on" tool for all personnel conducting field activities.

September 21, 2010
8:30 am – 3:00 pm

Monterey Bay Unified Air Pollution Control District
24580 Silver Cloud Court
